I have multiple skills. I am a front- end web developer. I have more than one year of experience and currently I am working on it. I have done some projects and I can design any page with functionalities. I can build an interactive user interface using the React JS library and the Next JS framework. I have more than three years of experience working with Arduino, sensors, and compatible technologies. I can design complex circuits. I have done many projects in robotics and I have participated in many inter- university robotics competitions. I can also make APIs in Python using FastAPI. I am dedicated to my work.
